# Maths at USI in Key Stage 1 and 2

## Parent Workshop

# **AGENDA**

- **Maths at USI**
- **Schemes we use**
- **Arithmetic**
- **How our lessons look in KS1**
- **Parent Task KS1**
- **How our lessons look in Year 3 and 4**
- **Parent Task - Lower Key Stage 2**
- **How our lessons look in Upper Key Stage 2**
- **Parent Task Upper Key Stage 2**
- **Questions**

# Primary Maths at USI

- ‘Influenced, inspired and informed by the work of leading Maths researchers and practitioners across the world...’
- Offer a vast bank of clear, practical resources which we adapt to suit the needs of our children.
- Schemes now used in 140 countries and by 80% UK primary schools.

# Why?

- The curriculum designed by White Rose Maths is split into schemes of learning for each year group. These schemes of learning break down what children should learn in each week of each term to master and build upon their foundational Maths skills.
- The White Rose Maths curriculum encourages the CPA approach (Concrete, Pictorial, Abstract), teaching children a deeper understanding of Maths problems.
  - This approach helps children to visualise, describe and experiment with mathematical concepts, ultimately improving their mathematical fluency.

# CPA Approach

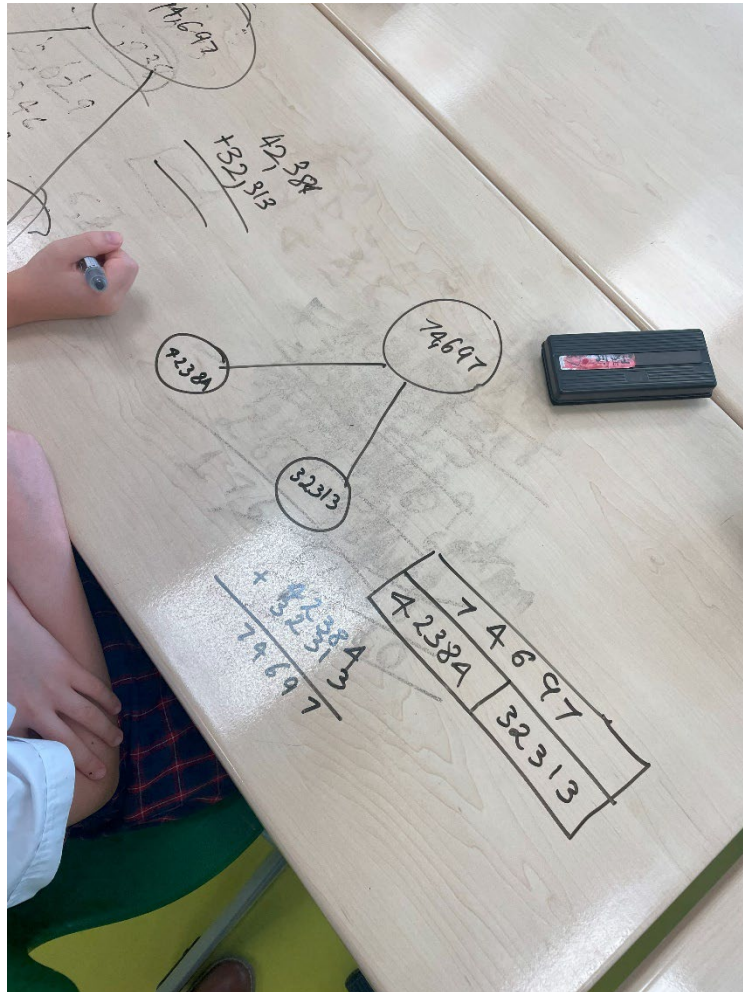

# Teaching for understanding and not just short cuts

# Providing children with a range of strategies

# Lesson structure

1) What number is represented?

2) Draw counters to represent 2,362

Thousands	Hundreds	Tens	Ones

3) What number is represented?

Thousands	Hundreds	Tens	Ones

- Teaching slides adapted to suit class.
- **Worksheets are used as and when the teacher feels necessary.**
- Children are given CPA opportunities.
- **Lessons start with warm up or addressing misconceptions.**
- Other resources available for children who need additional support.
- **Reasoning and problem solving used to challenge and stretch children.**

# Weekly arithmetic lessons

## Week 6

QUESTION

9.2 x 1,000 =

Millions	Hundred Thousands	Ten Thousands	Thousands	

1	561 - 10 =		13	3.5 + 4.781 =	
2	9 x 3 =		14	7 x 2 - 5 =	
3	6,388 - 4,861 =		15	417 x 53 =	
4	9 <sup>2</sup> =		16	$\frac{1}{3} \div 7 =$	
5	5 x 4 x 6 =		17	0.8 x 60 =	
6	65 x 8 =		18	3,222 ÷ 18 =	
7	42 ÷ 7 =		19	30% of 210 =	
8	$\frac{5}{8} + \frac{1}{8} =$		20	4 - 1 $\frac{2}{7}$ =	
9	1.5 x 100 =		21	$\frac{8}{10} \times \frac{1}{4} =$	
10	$\frac{1}{5} + \frac{1}{15} =$		22	2.3 ÷ 100 =	
11	5,509 + 3,704 =		23	4 $\frac{1}{2}$ x 3 =	

0 - SUPPORT

2  $\frac{3}{8}$

Key Vocabulary	Ratio Language	The Ratio Symbol
ratio	For every 1 circle, there are 2 triangles.	 <p>The ratio of footballs to rugby balls: 1:4 The ratio of rugby balls to footballs: 4:1</p>
proportion		
"for every... there are..."	For every 2 bananas, there are 3 apples.	 <p>The ratio of circles to triangles: 2:3 The ratio of triangles to circles: 3:2</p>
part		
whole	For every 1 football, there are 3 rugby balls.	
scale factor		
enlargement	<b>Ratio and Fractions</b>	
similar shapes		 <p>The ratio of apples to bananas: 1:2 The ratio of bananas to oranges: 2:3 The ratio of apples to bananas to oranges: 1:2:3</p>
length	For every 1 rugby ball, there are 2 footballs.	
width	Ratio of rugby balls to footballs: 1:2 $\frac{1}{3}$ of the balls are rugby balls.	
perimeter		
	For every 1 triangle, there are 3 squares.	

Ratio and Proportion Problem-Solving

Scale Factors

**Ingredients for Fruit Smoothie**  
(serves 10 people)

- 800g of bananas
- 500g of strawberries
- 200g of raspberries
- 700ml of milk
- 300ml of natural yogurt

To use the ingredients for 1 person, you divide all the quantities by 10 ( $\div 10$ ).

To use the ingredients for 5 people, you halve all the quantities ( $\div 2$ ).

To use the ingredients for 20 people, you double all the quantities ( $\times 2$ ).

Shape A has been enlarged by a scale factor of 2 to make Shape B.

Shape B is now two times as big as Shape A.

In a bag of 15 sweets, there is 1 smiley face sweet for every 4 love heart sweets.

Therefore, there will be 3 smiley face sweets and 12 love heart sweets in the bag.

Shape B has been enlarged from Shape A by a scale factor of 3.

Shape B is now three times as big as Shape A.

# Ratio

B

Name \_\_\_\_\_

1 Complete the sentences.

For every 1 cherry, there are  plums.

1 mark

For every 2 bananas, there are  carrots.

1 mark

2 Complete the sentence.

For every 1 cylinder, there are  cubes.

1 mark

3 Alex has these coins.

Whitney has these coins.

Alex says that for every 3 coins she has, Whitney has 5 coins.

Is Alex correct?      yes      no

Explain or show why.

1 mark

4

The ratio of circles to squares is  :

1 mark

Complete the ratio in 2 different ways.

The ratio of rectangles to triangles is  :

The ratio of rectangles to triangles is  :

2 marks

2 marks

5 Circle the equivalent ratios.

2 : 10    1 : 5    3 : 12    8 : 4    3 : 15

White  
Rose  
Maths

6 Part of a bar is shaded.

What fraction of the bar is shaded? \_\_\_\_\_

1 mark

What is the ratio of shaded parts to non-shaded parts? \_\_\_\_\_

1 mark

7 For every 4 boys in a class, there are 2 girls.

There are 24 children in the class.  
How many girls are there? \_\_\_\_\_

2 marks

8 The ratio of red to blue cubes in a tower is 1 : 5  
There are 6 red cubes in the tower.  
How many cubes are blue? \_\_\_\_\_

1 mark

9 Eva has some red and green grapes.  
For every 5 green grapes, she has 3 red grapes.  
She has 35 green grapes.

How many more green grapes than red grapes does Eva have? \_\_\_\_\_

2 marks

10 A field is drawn to scale.  
Each square on the grid represents 3 m.

What is the length of the field? \_\_\_\_\_ m

1 mark

Another field is 9 m long and 6 m wide.  
Draw this field on the grid above.

2 marks

11 Here are two triangles.  
Triangle B is an enlargement of triangle A.

What is the scale factor of enlargement? \_\_\_\_\_

1 mark

# Assessment in Primary Maths

• Enc	Working Below	1-3	Arithmetic and
	Emerging	4	
	Expected	5	
• Enc Rea	Secure	6-7	
	Excellence	8-9	

(6C8) Solve problems involving addition, subtraction, multiplication and division	6	6	8	6	6	7	7	5	6	8	5	4	5	6	8	5	8	6	5
(6C9) Use their knowledge of the order of operations to carry out calculations involving the four operations	8	8	9	8	8	8	8	7	8	9	6	5	6	8	9	7	9	7	6
<b>Number - fractions (including decimals and percentages)</b>																			
(6F2) Use common factors to simplify fractions; use common multiples to express fractions in the same denomination	8	6	9	7	7	8	8	6		8	5	5	6	8	8	7	8	7	8
(6F3) Compare and order fractions, including fractions > 1	8	7	9	7	7	7	7	5		8	6	5	6	7	8	7	8	8	7

**EXAMPLE SLIDES  
AND PHOTOS FROM  
KS1**

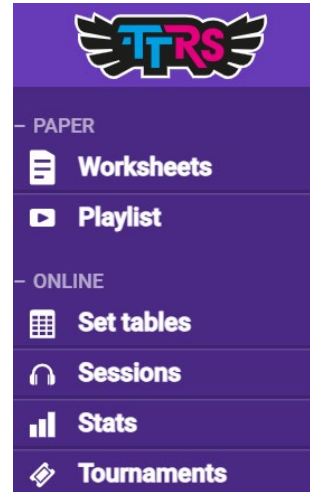

1. CPA
2. Group work
3. Explanation
4. Problem-solving
5. Fluency

# At Home Support

- TTRS
- Practical resources
- Quick, play-based learning.

**KS1**

**PARENT TASK**

How would you approach this question?

- How would you explain it to a 6-year-old?
- We would build up this in Y1 by using non-standard units: (blocks, toys, classroom equipment)
- Practical resources and lots of teacher modelling

- Kim, Max and Jo each have a piece of ribbon.

- ▶ How much longer is Max's ribbon than Kim's?
- ▶ Max and Jo put their ribbons together.

How long are they altogether?

**EXAMPLE SLIDES  
AND PHOTOS FROM  
LOWER KS2**

Draw a shape on the grid with an area of 5 squares.

Do you think Mr Temple is correct?

The squares all need to make one shape and join at the sides

There are 13 squares inside the shape.

The area of the shape is 13 squares.

**Lower KS2**

**PARENT TASK**

# **Lower Key Stage 2 Parent task**

**How would you answer this question?**

$$86 \div 5$$

**We can use a tens and one frame or a part-part-whole model**

**This help with understanding what they are learning.**

1)  $84 \div 3 =$

2)  $85 \div 3 =$

3)  $83 \div 3 =$

4)  $490 \div 7 =$

**EXAMPLE SLIDES  
AND PHOTOS FROM  
UPPER KS2**

Maria, Jolie, Alessia, Noelia and Mr Tezgel are running around the USI astroturf pitch.

1 lap of the school pitch is 300 m.

Noelia runs 900 m  
Mr Tezgel runs 2,100 m

How many more laps did Mr Tezgel run?

Mr Tezgel ran 4 more laps

**TOGETHER**

**Sophia has 2 litres of PRIME.**

**TOGETHER**

**She pours 450 ml for Sama.**

**She then gives a quarter of a litre to Tia.**

**She drinks 350 ml herself.**

**How much PRIME is left?  
Give your answer in ml.**

**UPPER KS2**

**PARENT TASK**
